North 132A

Contrary to popular belief, a lot of creativity goes into science and engineering. Whether it's noticing previously undiscovered patterns or coming up with new ways to solve problems, STEM professionals draw inspiration from a number of sources. In this panel, experts will discuss how comics and pop culture have influenced science.

Teachers will find out how to incorporate the arts and pop culture in science to make lessons more unique and engaging.

Deborah Haralson, Graduate Degree, Computer Science, Grand Canyon University

Brett Scott, 20+ years experience, Computer Science, Cybersecurity, Founder of Cyberwarefare Range, AVnet

Romeo Farinacci, Graduate Student, CyberSecurity, Grand Canyon University
