

Crossing into the Fifth Dimension: The Science of The Twilight Zone

5/25/2017 7:30:00 PM

1 Hour Science North 131C

Besides having an iconic opening theme, The Twilight Zone also explored complex issues through the lenses of sci-fi, horror, and sometimes fantasy. In this panel, experts will discuss these topics and how well the show applied them to give it's message.

Teachers will discover resources for teaching creative writing and discussion points for student engagement in popular culture.

Joe Fortunato, Lecturer, Graduate Student, Journalism and Mass Communication, Cronkite School-Journ/MassComm, Arizona State University

Prajwal Paudyal, Graduate Student, Computer Science, Ira A Fulton Engineering, Arizona State University

Bradley Lusk, Arizona State University, Postdoctoral Researcher
