Science

North 131C

Although the broad dissemination of information made possible by modern technology is largely a good thing, it also makes possible the spreading of falsehoods. this panel covers where bad information comes from, how it spreads, and how to recognize it.

Teachers will discover the science falsehoods and lies.

Lev Horodyskyj, Graduate Degree, Astrobiology, School of Earth and Space Exploration, Arizona State University

Alexander Nunn, Sub Contractor for Helios Group, Set up Servers, Cyberwarefare Range

Sean Peters, Graduate Student, Psychology, Geoscience, Arizona State University

Spencer Morrell, English as second Language Professor, Psychoanalytical Linguistics, Gateway Community College
