

I Get a Kick Out of You: The Science of Pharmaceuticals

5/26/2017 10:30:00 AM

1 Hour

Science

North 132BC

*The Bourne Legacy*, *Dredd*, and *Limitless* all feature the use of compounds that greatly enhance their users; though often with undesirable side effects. Our experts discuss how pharmaceuticals are developed and tested, and how close we are to a *smart pill*.

Teachers will learn about current research in pharmaceuticals and possible future of the impact in the learning process as well as day to day living.

Kimberly Olney, Graduate student, Genetics and Bioinformatics, Arizona State University

Debra Nickelson, Graduate Degree, Veterinarian and business Expertise, Centaur Animal Health

Teagan Wall, Doctorate Degree, Neuroscience, Biology and chemistry, Writer for Bill Nye Saves the World and Braincraft
