

## No Controversy to Teach: The Science of Global Warming, Vaccines, and Evolution

5/26/2017 9:00:00 PM

1 Hour          Science                  North 131C

Despite overwhelming consensus in the scientific community, there are many topics on which there is considerable disagreement in the public discourse. Learn why this discrepancy exists and why scientists believe what they do.

Teachers discover controversies revolving around some scientific knowledge to be able to talk about them in an unbiased way when it is brought up in a classroom setting.

Melissa Wilson Sayres, Graduate Degree, Genetics/ Biology, Programming Arizona State University

Ofir Levy, Graduate Degree, Ecology, Physiology, Climate Change, Evolution, Arizona State University

Christian Ross, Graduate Student, Studying Biochemistry and Genetics, Arizona State University

Christina Forbes, Graduate Degree, Chemistry and Biochemistry, Arizona State University
