

Reaching the stars: Increasing accessibility in education

5/26/2017 1:30:00 PM

1 Hour Education North 131C

Having a disability should never prevent a student from reaching their dreams. As technology progresses, new tools have been developed for bringing accessibility to the student. Join our speakers as they talk about what tools are available, where to find them in the state, and then have a chance to demo a few.

Teachers will discover and explore new tools and technology that will allow students with disabilities to minimize the impact of their disabilities.

Rolando Robles, Graduate Degree, Mathematics Education, Arizona State University

Jennifer Beam, Graduate Degree , Current S.T.E.M Teacher, 20+ years of education experience, Arizona Science Center

Page Baluch, Graduate Degree, Cell Biology and Microscopy, School of Life Sciences, Arizona State University
