

Smarts and Crafts: Buildable Science Lessons

5/26/2017 10:30:00 AM

1 Hour Education North 131C

Let's discuss hands on activities that can be used to bring science into the classroom, such as paper microscopes and balsa gliders.

Teachers will discover ways of affordably making science more engaging and hands on to make the learning process more enjoyable for the students

Shawn Hardina, BS in Physiology, Teaching certificate in Chemistry, General Science, and Career and Technical Education, Received National Board Certification for Chemistry in 2002, STAX 3D

Jennifer Beam, Graduate Degree , Current S.T.E.M Teacher, 20+ years of education experience, Arizona Science Center

Justin Koh, software engineer, 5 years professional experience, Google Making and Science
