

Super Friends: The Science of the Justice League

5/25/2017 12:00:00 PM

1 Hour Science North 132BC

The Justice League's membership includes aliens, cyborgs, mythological royalty, and billionaire playboys. With their powers combined, they are something even greater. Experts discuss the science between the powers and gadgets of the Justice League.

Teachers will discover resources for teaching creative writing, current topics in enhanced human senses and discussion points for student engagement in popular culture.

Joe Fortunato, Lecturer, Graduate Student, Journalism and Mass Communication, Cronkite School-Journ/MassComm, Arizona State University

Jeffery Tinius, Research Assistant, Google

Romeo Farinacci, PhD, CISSP/CISM/GSLC, Grand Canyon University
