

Technology and Entrepreneurship: How to teach 21st century skills

5/25/2017 3:00:00 PM

1 Hour

Education

North 131C

Emerging technology in fields such as artificial intelligence, robotics, autonomous vehicles, 3D printing, and 3D Design are creating new and exciting opportunities. Exposing students to these technologies, as they relate to gaming, costuming, film, robotics, engineering, music, and much more, is a perfect way to provide them numerous ways to learn 21st century skills and an entrepreneurial spirit.

Teachers will discover community technology entrepreneurs, how to access curriculum resources to teach entrepreneurship and discussion points for student engagement with the gaming, costuming, film, robotics, engineering, music industries.

Brian Calaway, Director at Odyssey of the Mind After School

Robert Birdsall, Graduate Degree, Cybersecurity & Law Enforcement

Shawn Hardina, Executive Vice President STAX Education

Deborah Haralson, Associate Professor at Grand Canyon University
