

The Limit is Imagination: How to teach technology in resource-limited settings

5/26/2017 12:00:00 PM

1 Hour          Education          North 131C

Computers and similar technologies are, increasingly, becoming necessary for success. Yet, many students do not have access to these at home and schools have limited resources to provide them in the classroom. In this panel, we'll discuss ways to overcome these challenges.

Teachers will find out how to solve and overcome the problems that are caused by the need of technology, that will give all students a chance at success.

Justin Koh, software engineer, 5 years professional experience, Google Making and Science

Earl Aguilera, Graduate Degree, Digital Media and Learning, Arizona State University

Dani Kachorsky, Graduate Degree, Education and Literacy, Arizona State University

Katherine Burdick, 5 Years Experience, Technology background, Technology Integration Matrix
