

We'll Skype You In: Remote classroom teaching

5/25/2017 10:30:00 AM

1 Hour

Education

North 131C

Virtual classrooms are becoming increasingly popular, with some students never speaking with their teacher in person. Let's discuss how to get the most out of these technologies while mitigating their disadvantages.

This panel will discuss the current technologies and applications that can allow teachers to access scientists and researchers in remote locations

Teagan Wall, PhD in Computation and Neural Systems with degrees in Behavioral and Social Neuroscience, Political Science, Economics, and Mathematics

Rebekah Brubaker, CEO RealtimeSTEAM, biotech researcher with a specialty in cell biology

Caolan Head, Graduate Student, Arizona Science Center
