North 132BC

Virtual Reality gaming is here but how close are we to something like the NerveGear in SAO? Or even the Sibyl system of Psycho Pass where a mega-computer determines your path in life. Technology is developing faster than we can adapt to it. Learn what this might mean for our future.

Teachers will learn about the future possibility of a computerized society and what it means for our life both educationally and socially.

Josef Shindler, Graduate Degree, 10 Years in Game Development, Education through Exploration Center at Arizona State University

Ryan Stikeleather, Graduate Student, Molecular Biology, Genetics, R Programming, Arizona State University

Rebekah Brubaker, Graduate degree, Biotechnology, Cell biology, RealtimeSTEAM, Arizona State University
