

AC/DC: The Science of Nikola Tesla

5/28/2017 1:30:00 PM

1 Hour

Science

North 131C

He had around 300 patents in 26 countries. He went up against one of the world's largest think tanks all by himself. A whole company has been built around his electric motor. Was he a modern Da Vinci, or a pretender to Edison's throne? In this panel experts will settle this debate once and for all.

Teachers take part in a discussion with experts about the contributions of Nikola Tesla to current and emerging technologies.

Mario Mendez, Atwell, LLC, Engineer

J'Neil Cottle, Graduate Student, Astrophysics, Data Science, Arizona State University

Jim DeGraffenreid, Graduate Degree, Physics, Arizona State University
