

Brain Research and "Legion": Super Heroes Face Mental Illness

5/27/2017 6:00:00 PM

1 Hour Science North 131C

The protagonist in Legion is an extraordinarily powerful mutant who struggles with mental illness. In this panel, experts discuss the strange world of the brain and mental health and how well the show portrays it.

Teachers will learn about current topics in brain research, neurobiology and mental health advocacy.
