

Building the Future: How to become a STEM professional

5/27/2017 12:00:00 PM

1 Hour

Science

North 132BC

Members of the Science, Technology, Engineering, and Mathematics fields discuss their career paths and how you might join them in discovering and building the future.

Teachers will be exposed to various STEM fields and how to get into the field, then use the knowledge to help guide and students their students in the career fields.
