Science

North 132BC

Many scientists study strange and potentially dangerous things. Our scientists discuss what scares you when your day job involves working with viruses, spiders, radiation, or lava.

Teachers will learn about the dangers of a research lab in various fields of study and use their stories to encourage safety in the classroom.

Lydia Meador, Graduate Student, Virology, Molecular Biology, Arizona State University

Valerie Harris, Graduate Student, Cancer Biology, Evolution, Arizona State University

Benn Gleason, Graduate Degree, Material Sciences and Engineering, Raytheon
