

Finding Forest Sprits: Science and Conservation in Princess Mononoke

5/27/2017 12:00:00 PM

1 Hour          Science                  North 132A

Princess Mononoke features a conflict between those that wish to preserve the natural environment and those that wish to exploit it. Our scientist experts will discuss conservation and the lessons we can learn from this movie.

Teachers discover current topics in ecology, resouces for teaching biology in the classroom, and conversation starters for engaging classroom discussion about the environment.

Emily Webb, Graduate Student, Animal Behaviour, Physiology, Arizona State University

Aireona Bonnie Raschke, Graduate Student, Ecology, Conservation Biology, Arizona State University

Kristina Davis, Graduate Student, Astronomy and Engineering, Arizona State University

Joel Lusk, Graduate Student, Biological Design, Ira A Fulton Engineering, Arizona State
