

He Rode a Techno Saddle: The Science of Westworld

5/28/2017 3:00:00 PM

1 Hour Science North 132A

Westworld features an immersive themepark where state-of-the-art androids promise a repercussion-free getaway. In this panel, scientists and engineers will discuss current developments in robotics and how far Delos is from becoming reality.

Teachers discover current topics in robotics, artificial intelligence and artificial limbs in order to inspire classroom projects and discussions.

Andrew Thoesen, Graduate Student, Studying Space Engineering, Arizona State University

Ryan Ang, Student, Computer Science, Computer Engineering, Cyberwarefare Range

Elio Greico, 10+ years Professional Experience, Cyber Security, E2T2
