

I Can See Clearly Now: The Science of Light

5/27/2017 3:00:00 PM

1 Hour Science North 132A

Let us illuminate you! Light is one of the most important tools in research and development. Using it, scientists can see into the depths of space or the components of a cell.

Teachers will find out how light is used and the importance of it in the science community for discovery and research.

Page Baluch, Graduate Degree, Cell Biology and Microscopy, School of Life Sciences, Arizona State University

Genevieve Studer-Ellis, Graduate Student, Planetary Geology, School of Earth and Space Exploration, Arizona State University

Karen Knierman, Graduate Degree, Astronomy, Physics, School of Earth and Space Exploration, Arizona State University

Andy Ryan, Graduate Student, Planetary Sciences/Geology, Arizona State
