

My Lab Bench is 1000–∞C: Scientists that risk it all

5/28/2017 4:30:00 PM

1 Hour

Science

North 132BC

Standing 5 feet from an erupting volcano or working with a disease that can kill you while in a hazmat suit, science can be dangerous. In this panel scientists will discuss their working conditions and the steps they take to make sure they (and you!) stay safe.

Teachers will learn about the hazards of extreme research and the challenges in STEM careers.

Robert Birdsall, Graduate Degree, Cyber Security and Law Enforcement, E2T2

Valerie Harris, Graduate Student, Cancer Biology, Evolution, Arizona State University

Joel Lusk, Graduate Student, Biological Design, Ira A Fulton Engineering, Arizona State University
