

No Longer Hidden: The Women of Science

5/27/2017 12:00:00 PM

1 Hour Science North 131C

Hidden Figures shined a light onto the often-overlooked contributions of women and minorities in STEM. Meet STEM professionals who were inspired by those of the past to chart the course of the future

Teachers will learn the about some eclipsed achievements in STEM of certain women and minorities and how they they are different from women and minorities in the past and how they intend on changing this situation in the future. Then use their stories to inspire similar students to go into STEM.
