

Old Man Logan: The Science of Aging

5/27/2017 7:30:00 PM

1 Hour

Science

North 131C

Logan features much older versions of Wolverine and Professor X . Our scientists discuss whether aging is inevitable or a process that can be prevented or even reversed?

Teachers will learn about the aging process in humans, if it can be reversed and how close are we to being able to do so.

Cindy Xu, Graduate Student, Regeneration and Developmental biology, Arizona State University

Alex Andre, Graduate Student, Immunology, Biology, Muscle development, Arizona State University

John Cornelius, Graduate Student, Bioinformatics, Genetics, Arizona State University

Emily Webb, Graduate Student, Animal Behaviour, Physiology, Arizona State University
