

Planet 9 From Outer Space: Our Neighbor in Hiding

5/28/2017 3:00:00 PM

1 Hour Science North 131C

Long after the discovery of Pluto, many scientists believe there is another planet even further out in our solar system. Scientists and Astronomers discuss the evidence and why it has been so hard to find.

Teachers will discover the techniques being employed to search for our Solar System's ninth planet.

Alma Ruiz-Velasco, Graduate Degree, Radioastronomy, Interferometry, Lowell Observatory

Joe Fortunato, Graduate Degree, Communication, Film and Theater, Walter Cronkite School, Arizona State University

Jackie Monkiewicz, Graduate Student, Astrophysics, School of Earth and Space Exploration, Arizona State University
