

Planet of the Apes: The Science of Hominid Evolution

5/28/2017 1:30:00 PM

1 Hour          Science                  North 132A

The Planet of the Apes movies feature a civilization of intelligent apes that is often in conflict with humans. Given what we know about the evolution of humans and our ape relatives, is this realistic? Experts will discuss this and more.

Teachers will find out the whether apes have the ability to become a rival of human mentally and learn more about evolution and anthropology.
