

## There and Back Again: What NASA Has Learned from Dawn and New Horizons

5/28/2017 4:30:00 PM

1 Hour          Science                  North 132A

We built them, we launched them, they made it to their destinations and they took some pictures. Its been some time, the teams have analyzed some of the data so what have we learned? Talk with the experts about the two missions and ask your questions about deep space exploration.

Teachers will learn about deep space missions and why so much is invested into the missions and their purpose and what we have gotten out of the missions.

Vishnu Reddy, Graduate Degree, Space Object Behavior Science, Spectroscopy, Lunar and Planetary Labortory, University of Arizona

Lucille Le Corre, Graduate Degree, Planetary Sciences, OSIRIS-Rex, Planetary Science Institute

David Williams, Graduate Degree, Plantary Science, Arizona State Univeristy

Jessica Noviello, Graduate Student, Geological Sciences, School Of Earth and Space Exploration, Arizona State University
