

Winter is Coming: The Science of Game of Thrones

5/27/2017 10:30:00 AM

1 Hour

Science

North 132BC

Westeros is home to a giant wall of ice, strange seasonal patterns, and some high-profile cases of inbreeding. Our experts will explore the science of A Song of Ice and Fire.

Teachers will partake in a discussion of political science, economy, health and other STEM topics inspired by Game of Thrones.

Cindy Xu, Graduate Student, Regeneration and Developmental biology, Arizona State University

Robert Strausbaugh, Graduate Student, Physics, Cosmology, Arizona State University

Cole Mathis, Graduate Student, Astrobiology, Origin of Life, Information in Biological and Chemical Systems, Arizona State University
